Mr. Magee,

One additional point regarding my clarification below.

To the extent the County believes any responsive communications must be withheld in their entirety, I request at minimum the non-privileged metadata of those communications: the sender, all recipients and CC'd parties, the date and time, and the subject line or topic. This information is not protected by attorney-client privilege, does not constitute law enforcement records, and is not confidential under any applicable statute. The identity of parties to a communication among public officials regarding public business is itself public information.

I am entitled to know which members of the Commissioners Court were communicating with one another about these subjects, even if the substance of those communications is withheld.

Please include this supplemental clarification with your submission to the Attorney General's Office.

Mr. Magee,

To clarify the scope of my March 10, 2026 Public Information Act request regarding communications:

I am not seeking communications between the County Attorney and the Sheriff regarding any criminal investigation or prosecutorial matters. Those communications may be excluded from the scope of this request.

I am also not seeking any communications that are protected by attorney-client privilege. Any communications constituting legal advice from counsel to county officials may be excluded from the scope of this request.

McKnight Matter – Correspondence

My request is specifically directed at communications to, from, between, or among any members of the Commissioners Court — County Judge Ty Prause and Commissioners from Precincts 1 through 4 — concerning the subjects identified in my original request. This includes any communications from the County Attorney or Sheriff directed to members of the Commissioners Court on those subjects, but does not include internal communications solely between the County Attorney and the Sheriff.

To be clear, I am seeking factual communications among elected officials regarding county governance matters — including but not limited to discussions of civil liability, federal grant compliance, PREA policy failures, and the January 19, 2026 incident. I am not seeking legal advice or prosecutorial deliberations.

These clarifications should resolve any concerns regarding Sections 552.107 and 552.108. The remaining communications fall squarely within the scope of the Public Information Act.

Please forward this clarification to the Attorney General's Office in connection with your pending ruling request and I will also include in my brief to the AG.
