[redacted] / Probation Sanction

Justin,

25th adult probation wants to sanction Loraine to 10 days in jail or extend her probation. We're leaning towards just doing the 10 days instead of extending probation for 3 months.

I have a couple of questions:

She has some severe medical issues including mental health issues. She is prescribed multiple medications some of which have to be administered 3 times a day plus an injectable due to severe vitamin deficiency.

Will she be able to have all of her medications? She is also prescribed a THC oil for her neuropathy in her feet, is that going to be a problem?

As long as she can receive her medication, the 10 day route is what she's going to choose.

Lastly, does sanctioned time qualify for the 2 for 1 time in jail? (I know this is something Curly routinely did)

Thank you for your time,

[redacted]

P.S. I hope you're enjoying your new role over there (giving you gray hair yet? lol)
